6. SPECIAL ANNOUNCEMENTS/PRESENTATIONS/GENERAL BUSINESS

6.1 Mid-Year Budget Presentation, Financial Consultant Ken Campo and Controller Martin Koran.

In summary, FC Campo and Controller Koran provided an overview of the Mid-Year Budget Report for Fiscal Year 2015-16, noting that the overall financial outlook for the District continues to improve going into the second half of fiscal year 2015-16. General Fund revenue is projected to exceed budget by approximately $2.5 million, primarily due to increased property tax revenue. Ambulance service charges are trending at a growth rate of 3% for the year and the current projection of $3.2 million exceeds the budget by $173,000. Reimbursements from the State and County are expected to exceed budget by $554,000. Of this amount, $80,000 is attributable to Ground Emergency Medical Transport (GEMT), with the remainder of $470,000 from the State Office of Emergency Services reimbursements for strike team deployments and the use of District fire apparatus last summer. Interest earnings on District investments are projected at $238,000, or $140,000 more than budgeted. The higher investment earnings are attributed to staffs' efforts to actively manage District investments.
Overall staffing costs, including overtime, are projected to be under budget by $2.2 million; of which, $1.6 million is attributable to lower retirement contributions. In 2015, the District began pre-paying CCCERA retirement contributions to take advantage of the significant pre-payment discount. The balance of the retirement contribution savings is the result of vacancies and the current year pre-payment savings of $413,000. Overtime costs are projected at budget for the year. These costs would have been approximately $450,000 under budget as a result of three less engineer positions to backfill. Overtime related to Strike Team deployments bring the costs in line with the budget. Services and supplies are tracking on budget for the year. Overall, we now project to add $4 million more to the General Fund reserve balance than initially expected when the budget was adopted last June; of which, $1 million stems for one-time sources of revenue ($920,000 of CCCERA 14/15 pre-payment carryover and $70,000 of GEMT reimbursement from the prior year).

The Capital Improvement Program (CIP) is funded annually through a transfer from the General Fund. The adopted budget included a $2 million transfer to the CIP; however, with the additional ongoing revenue the District is currently experiencing, staff is recommending the transfer be increased to $2.3 million. This will provide additional funding for the replacement of major apparatus and reduce the amount of future borrowings. Enhancements to the dispatch center, necessary to accomplish the consolidation of fire and police dispatch, was budgeted in the current year CIP at $1.4 million. Per the agreement, the District will front the start-up costs and be repaid by the City of San Ramon, with fixed annual payments, within four years. At year five of the agreement and after the District has been repaid for the start-up costs, the District and the City of San Ramon will share evenly the costs to operate and maintain the consolidated dispatch center. Fleet purchases of Command and Staff vehicles have been modified, with Board approval, to five-year leases. This will result in long-term savings, because of the reduction of maintenance costs.

Mid-year budget requests include increasing the General Fund revenue by $2,545,000, decreasing the General Fund expenditures by $2,254,000, increasing the Capital Project Fund expenditures by $53,000 and decreasing Debt Fund Service Fund expenditures by $8,000.

Motion by Director Parker to accept and approve the mid-year budget report as presented by staff, seconded by Director Kerr. Motion carries with (5) ayes and (0) noes.

All applicable documentation has been submitted to the State and is currently under review. In the meantime, in an effort to maintain the project’s timeline for consolidation, staff requested the expenditure of funds to expand the Communications Center 9-1-1 phone system and dispatch workstation capacity to accommodate the increase in call volume and personnel; to order furniture, phones and installation. Twenty-six fire hydrants were selected at this time because of their close proximity to residential care facilities, schools and churches. Replacement hydrants have a 4.5 inch outlet connection. Motion made by Director Stamey to authorize staff to replace up to 26 standard 2.5 inch fire hydrants to a model 64 steamer hydrant with a 4.5 inch outlet connection, in an amount not to exceed $40,000, seconded by Director Campbell.
